

METALIX

Premium Digital Presence for the Metal Construction Industry

A modern, high-performance website built for precision, strength, and impact.

2024 PROJECT BRIEF

STARTUP PITCH DECK

An illustration of a construction worker with blonde hair, wearing a blue shirt, a high-visibility orange and yellow safety vest, and blue jeans. He is standing on a steel beam of a building under construction, holding a large set of blueprints. In the background, there is a cityscape and a cloudy sky.

The Problem We're Solving

Outdated Industry Presence

Most metal construction firms rely on generic templates that fail to communicate craftsmanship, scale, or trust.

No Client Portal

Clients lack a dedicated space to track projects, submit requests, or access documentation – creating friction and opacity.

Weak Lead Conversion

Without a polished digital experience, qualified leads bounce before ever reaching the inquiry stage.

Project Overview

METALIX is a premium, full-stack website designed to elevate a metal construction company's digital identity. Built for performance, aesthetics, and operational clarity – it bridges the gap between industrial craftsmanship and modern web standards.

Goal

Convert visitors into qualified leads

Speed

Sub-2s load time target

Secure

Authenticated client access

Who We're Building For

Company Decision-Makers

CEOs and project directors seeking a credible, high-end digital presence to win enterprise contracts.

Commercial Clients

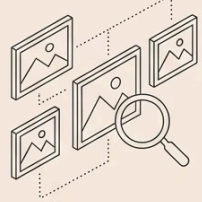

Developers, architects, and general contractors evaluating metal fabrication partners for large-scale builds.

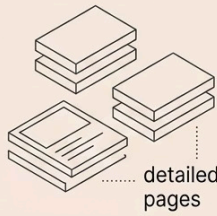

Existing Clients

Active project stakeholders who need real-time access to timelines, documents, and communication.

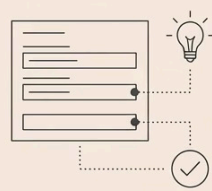

Main Features

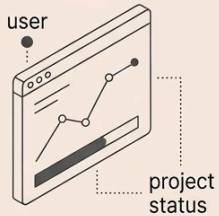

**PROJECT
PORTFOLIO
GALLERY** with
high-res imagery
and filtering.

**SERVICES
SHOWCASE**
with detailed
capability pages.

**QUOTE &
INQUIRY
SYSTEM**
with smart forms.

**CLIENT
PORTAL**
with project
tracking.

**ADMIN
DASHBOARD**
for content
management.

**SEO &
PERFORMANCE**
for search visibility.

Built for the Industrial Sector

Every feature is engineered to serve the unique demands of metal construction – from showcasing complex fabrication work to managing client relationships at scale.

- Key Differentiator:** The integrated client portal sets METALIX apart from standard construction websites, creating a sticky, value-driven experience.

Website Pages & UI Design

1

Home

Hero video, value props, featured projects

2

Services

Fabrication, installation, engineering

3

Portfolio

Filterable gallery with case studies

4

About

Company story, team, certifications

5

Contact

Smart inquiry form, map, CTA

Admin Dashboard & Client Area

Admin Dashboard

- Project & content management
- Inquiry inbox & lead tracking
- Analytics & performance overview
- Team access controls

Client Portal

- Live project status & milestones
- Document & blueprint access
- Secure messaging with project team
- Quote history & invoicing

- ✔ Both areas are protected with Supabase authentication, ensuring enterprise-grade security and role-based access.

Technologies Used

Next.js 14

React framework with App Router for server-side rendering, optimal SEO, and blazing-fast page loads.

Modern CSS

Tailwind CSS with custom design tokens for a consistent dark industrial theme – steel grays and orange accents.

Framer Motion

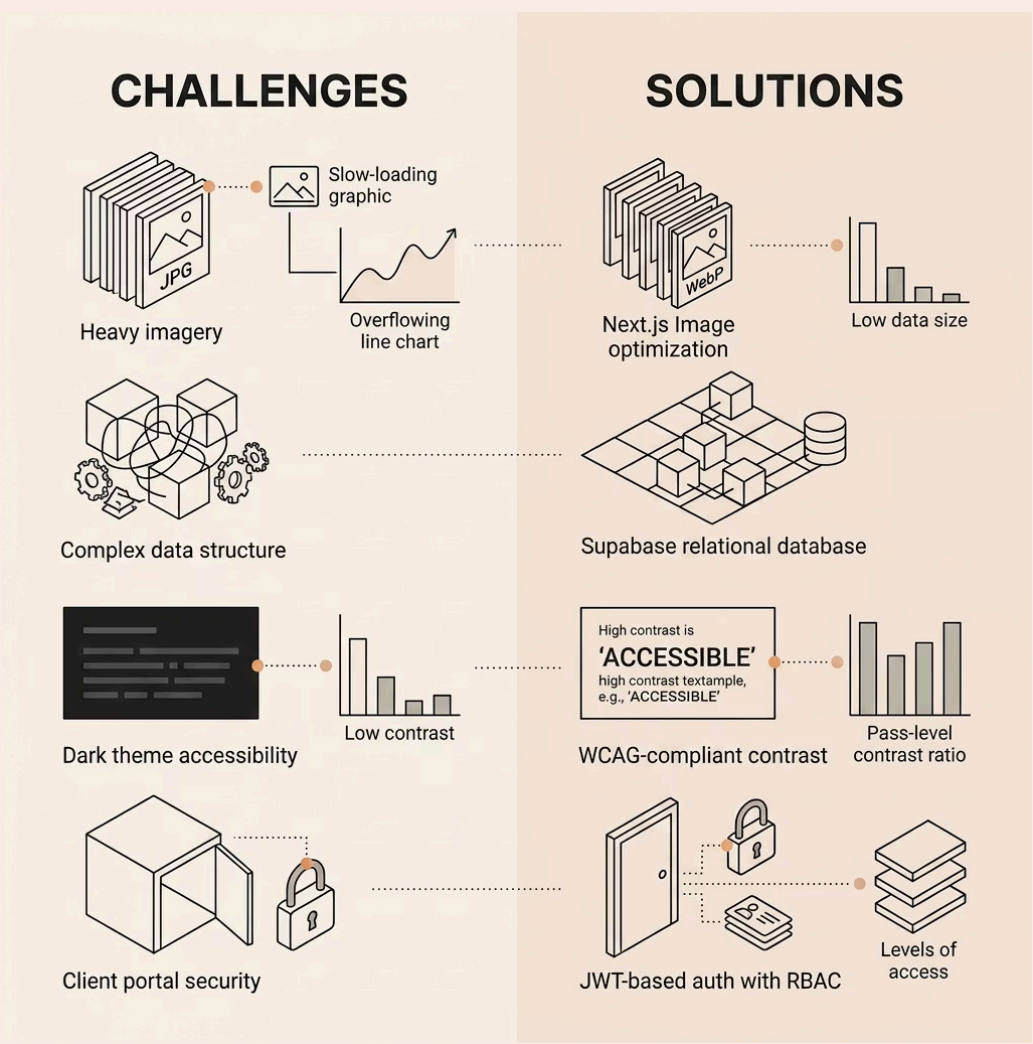

Smooth, hardware-accelerated animations that add polish without sacrificing performance or accessibility.

Supabase

Open-source backend with PostgreSQL, real-time subscriptions, and built-in auth – scalable and secure.

Challenges & Solutions

Engineering for Real-World Complexity

Each challenge was addressed with deliberate architectural choices – prioritizing performance, security, and maintainability without compromising the visual experience.

Conclusion & What's Next

✓ **Delivered**

A premium, fully functional website with portfolio, services, and inquiry system – ready for launch.

🚀 **Phase 2**

Client portal rollout, admin dashboard, and real-time project tracking integration.

🔭 **Future Vision**

AI-powered quote estimator, 3D project visualizer, and multi-language support for global expansion.

METALIX isn't just a website – it's the digital foundation of a modern metal construction brand built to win.
